CD 324 Assignment

Instructions

1. *This is an individual assignment*
2. *AI-generated content such as copying and pasting from ChatGPT will be penalized*
3. *Observe the deadline from the system*

Question 1

With the rapid advancement of technology, particularly Artificial Intelligence (AI), has gained the ability to aid in the design of educational materials and learning experiences. This prompts the question: Can artificial intelligence completely take over the job of designing how we learn, or do you believe that human instructors still have an important role to play? Discuss.

Question 2

You're a curriculum developer at a university exploring ways to enhance instructional design and e-learning processes. How can integrating blockchain technology improve instructional design and e-learning processes?

Question 3

You're an instructional designer tasked with developing an online learning platform for a university. As you delve into the design process, you consider how blockchain technology could enhance the tracking and verification of learner progress and achievements within your instructional design framework. How can blockchain facilitate the tracking and verification of learner progress and achievements in instructional design frameworks?

Question 4

You're an instructional designer tasked with developing an online course for a university that has recently transitioned to remote learning. As you plan your course delivery strategy, you consider the benefits of cloud computing in enabling scalability and flexibility in delivering instructional materials to learners. In what ways does cloud computing enable scalability and flexibility in delivering instructional materials to learners?
